Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malino, US #5,799,423 in view of Avrill, US #4,975,061.

3. Malino teaches a calendar including cardboard substrate support means 22, date locations 28 having a design or message thereon (Figures 5 and 7), and magnetic marker elements 32 (Figure 4A) which may be placed on the date locations. When markers 32 are removed, they reveal a message or design. The date locations correspond to a time period of one month, which may have familial significance or include a holiday. The pictorial design (Figure 1 for example) suggests events (months) associated with the time interval.

4. Malino does not teach a target location for the markers when they are not on the date locations, however this is well known in the art. Avrill teaches a calendar wherein markers 14 are placed in target location 13 when removed from date locations 11 (Figure 2). The markers make a pictorial design in the target location. It would have been obvious to a person having ordinary skill in the art to utilize a target location (as shown in Avrill) in the device of Malino so that the markers will not be misplaced when removed from the date locations.

Allowable Subject Matter

5. Claims 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not teach or suggest a calendar as specifically describe in claim 10 and further wherein the three dimensional bodies and recesses are shaped such that each body only fits in one date location and one target location.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 3826029, 4863386, 4058916 are cited as of interest.
